TWENTYFIVE50 BENCHING A WORKING SOLUTION

By observing and assessing the research and development both locally and internationally, the Twentyfive50 Benching System has been designed and developed to our exclusive design, and is manufactured locally at our technologically advanced manufacturing facilities. The Twentyfive50 Benching System is aesthetically light and balanced, and delivers creative solutions to a variety of space planning and functional needs.

The Twentyfive50 Benching System is a modular, easily configured and re-configured product, and is manufactured and assembled using a support beam based leg system, with additional architectural beams for supporting reticulation trays, screening, third level storage and accessories.

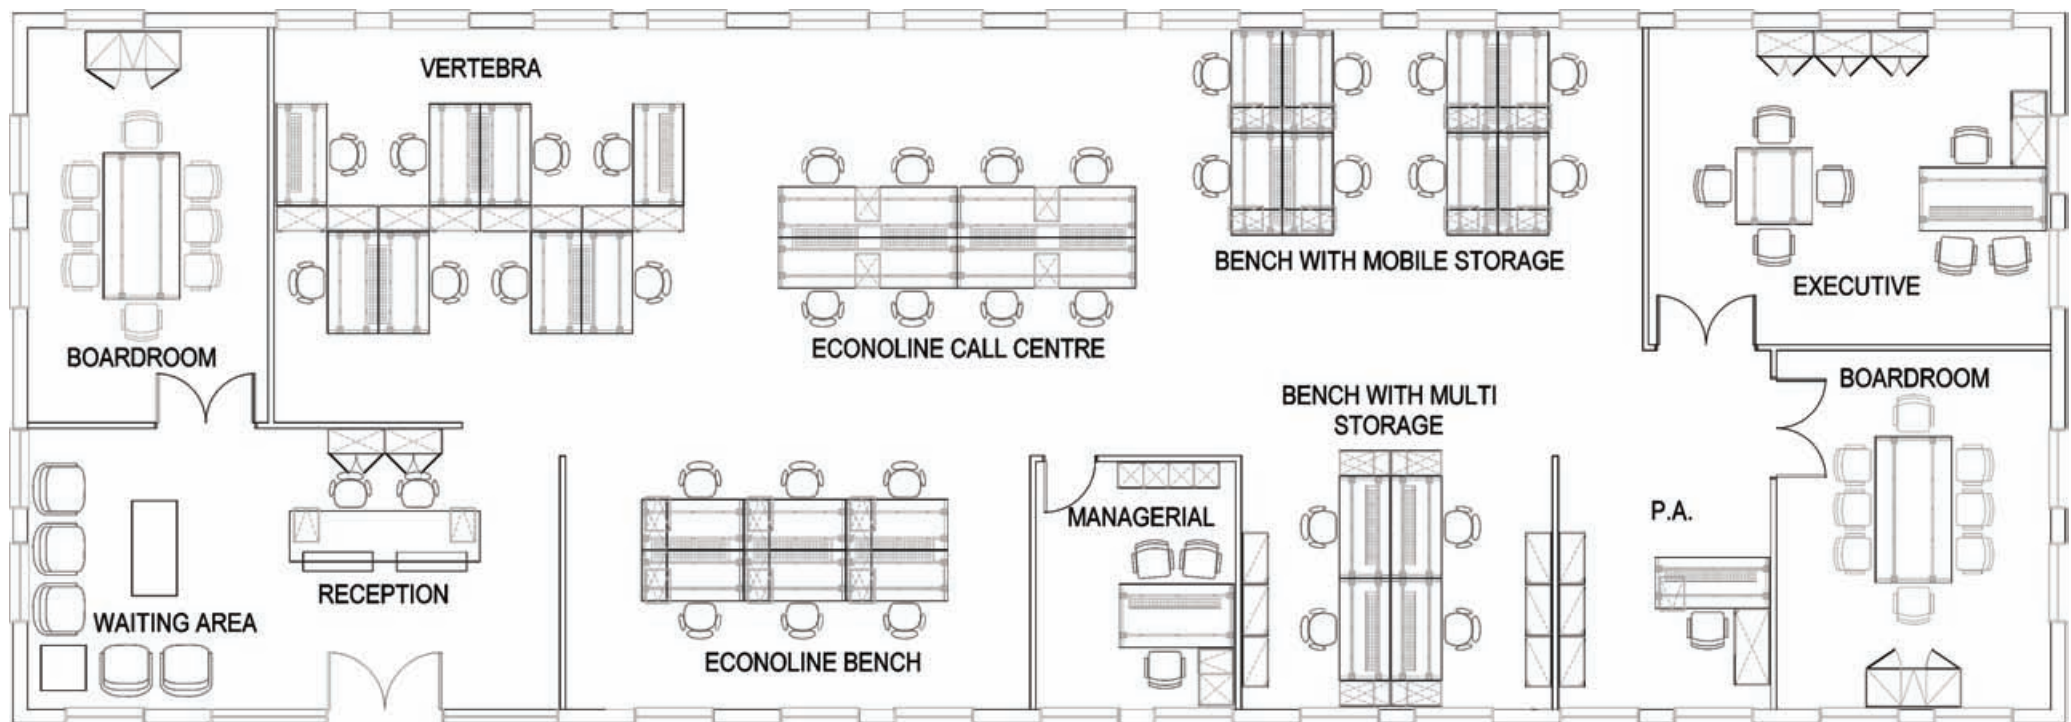

The Twentyfive50 Benching System simplifies facilities management, by integrating and optimizing effectively with all types of floor spaces. The ease of assembly / disassembly of the product, facilitates hassle - free installations, and frequent re-configurations, and creates productive working environments.

The minimal structure of the Twentyfive50 Benching System make workstations feel larger and more open, offering clear lines of sight, encouraging interactive teamwork, and improves communication.

The Twentyfive50 Benching System has an integrated cable management facility, that delivers convenient power and data to workstations. Power and data points can be located at workstation height, or just below, for easy access.

The Twentyfive50 Benching System is aesthetically light and balanced, and delivers creative solutions to a variety of space planning and functional needs. The workplace solution options inspire innovation, promote employee engagement and teamwork. Twentyfive50 offers a unique workplace identity that can express your organizational culture and brand and creates a productive work environment.

vertebra

07

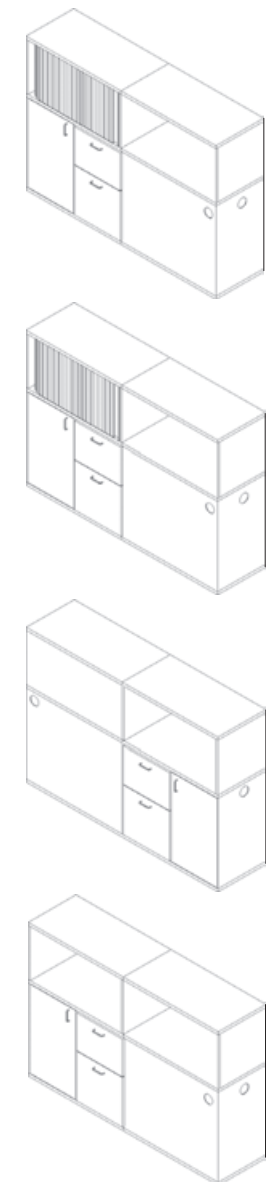

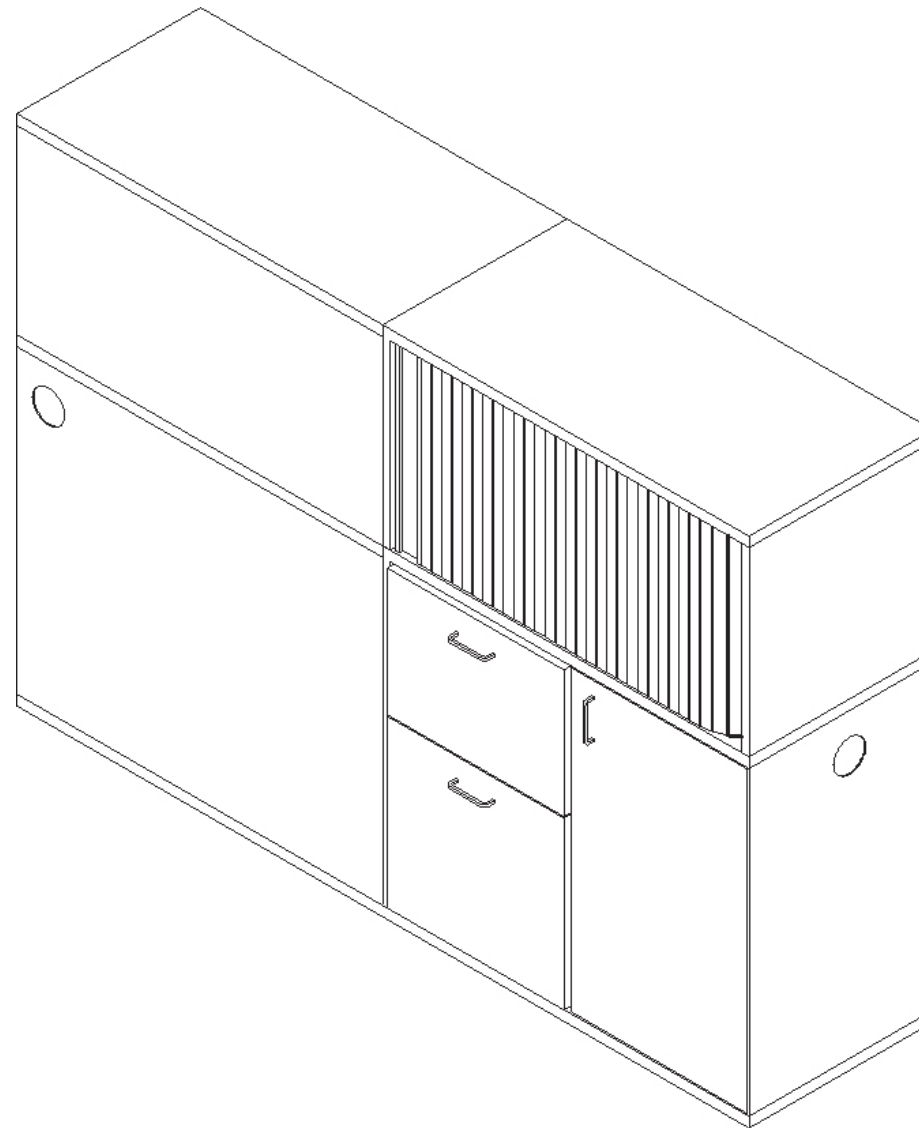

The Vertebra storage system offers the perfect solutions for all the storage functionality you need: Filing, Organization, Versatility and Space Utilization.

The Vertebra storage system is made up of a modular top storage unit, and bottom storage unit. The top storage unit is comprised of a pinboard section, and adjacent to the pinboard section, is a choice of either open storage or roller door storage compartments.

The bottom storage unit consists of a hinge door compartment, with a single shelf, and adjacent to the hinge door compartment, is a drawer unit consisting of 2 drawers (One single drawer, with a drop in pen and pencil tray and one drawer as a deep filer).

The Vertebra storage system has an integrated cable management compartment, placed between the top and bottom storage units, and is primarily used for reticulation purposes. Power and data cables are conveniently delivered to workstations through cable management ports, located on the sides, middle and back of the Vertebra storage units.
